COMPACTOR CUSTOMIZATIONS

OLD COMPACTOR W/ LOW TRASH CHUTE

CUSTOM COMPACTOR HOPPER EXTENSION

BEFORE

AFTER

WILKINSON HI-RISE offers complete compactor customization to fit any trash room condition and any existing trash chute location.

The “BEFORE” photo above depicts 1) old 25 year old compactor with backside cut out to accommodate immovable trash chute encased in CMU. This compactor was removed and disposed by Wilkinson Hi-Rise.

The “AFTER” photo above includes a new Wilkinson Hi-Rise model 350-C5 compactor with a customized hopper extension to “catch” the trash disposed from the “immovable” trash chute. This location provided more space in the trash room for the client since the compactor was parallel to the wall on the right side which provided a “straight” vs. “angled” container location.

Please call our service department for a free onsite inspection & estimate at (954) 342-4346 and ask for Mark Kavulich, Service Manager – Florida.
