### **TRASH CHUTE REDESIGNS**

**45 DEGREE CHUTE W/ CLOGGED OFFSETS**

**BEFORE**

**15 DEGREE CHUTE W/ HOPPER EXTENSION**

**AFTER**

**WILKINSON HI-RISE offers trash chute redesign services by providing custom trash chute sections to accommodate any challenging conditions.**

**The “BEFORE” photo above depicts the old trash chute that included two separate 45 degree offset locations. These constantly clogged up with trash. The compactor could not be relocated due to trash room aisle constraints.**

**The “AFTER” photo shows new sound insulated trash chute w/ two 15 degree offsets to solve the trash clogging problems. The compactor was “customized” with a new welded compactor hopper extension. The guillotine is also new.**

**Please call our service department for a free onsite inspection & estimate at (954) 342-4346 and ask for Mark Kavulich, Service Manager – Florida.**
