#### **CONVERT UNUSED SPACE INTO SALEABLE LOCKER SPACE!**

Wilkinson Hi-Rise offers a storage locker retrofit system capable of converting any interior space into saleable storage space for residents in multifamily dwellings and high rise condominiums. We will custom size our system to any layout. Typical panel sizes are 4' wide x 7'-6" tall. Ceiling sections are highly suggested to stiffen the newly formed locker and avoid additional penetrations into post tension ceiling slabs. The pictures above depict closure of a small vestibule space where the new locker owner will utilize the hollow metal door to access the locker. Typical locker size is 4' x 4' with an out swinging 4' wide door section. Residents are to provide their own locks. Send us your layout today!
